

Dear Colleagues,

I have rather rich and various 23-years (I am 46) patent attorney experience (worked both in leading agency and private practice). I am certified Professional Patent Attorney in Latvia, in my portfolio are independent and successful patents in the USA, European PO, Eurasian PO, China, Japan, Israel, Ukraine, India, Australia. Preferred specialization - mechanics, technics (mainly medical), hardware, engineering, ...

At the same time I would like to offer quality translations on relevant themes: Russian (native) -English Latvian in any combination.

I've graduated from the Latvian University (BS), specialty "Economic Cybernetics" (diploma - "Business Management").

I have a number of certificates by patent specialty.

The same 23 years I am actively engaged in innovative scientific and technical activities in the field of medical devices (www.coloncancer.lv): developing, creating, implementing, ... In connection with this work, I acquired a lot of additional knowledges and skills:

- writing, protection, management of 17 grant projects, including those co-financed by the EU,
 - participation in over 30 international scientific congresses, conferences, seminars, as well as exhibitions,
 - creation, editing of websites,
 - accounting (I have a certificate of a balance-sheet accountant),
 - computer fluency (besides the entire standard set of programs, I can work with graphic editors CorelDraw, Adobe Illustrator, AutoCAD, PhotoShop, programs for developing web pages, accounting software, client docketing systems, CAT-programs etc.)
 - I have experience in training medical technicians for clinical research,
- and many more good and useful features))

I hope we could be useful to each other.

Good luck!

Anda
